

# IB REVISION

A great revision course makes a student's life easier at a very stressful time, and greatly improves their chances of getting into the university of their choice.

## Features of a great revision course

The best IB teachers in schools will tell you that a short, intense revision course, with another great IB teacher, is invaluable. A fresh voice, with new ways of explaining the material, taking students through the key elements that they find challenging, can bring a new clarity and confidence in subjects at just the right time to support final grades. Different classmates and a new environment generate energy and motivation.

### Experienced IB Teachers

You need an experienced IB teacher who is up-to-date with teaching and examining their subject. They will be familiar with the latest syllabus changes, the types of exam questions the IB are currently asking, and the latest expectations of the examiners. And you need someone who has taught students across a range of abilities, and understands what they find challenging.

### IB Revision Specialists

You need an IB teacher who has become a revision specialist, having developed effective and flexible approaches and materials over years of revision experience. They can confidently lead a group of students from different schools with different challenges and grade expectations to improve their outcomes.

### Meeting Individual Needs

You need a carefully crafted programme for each student. The daily timetable must support intensive study. Class content should be based on student questionnaires, and then adapted as questions arise during the class. There is a huge benefit when students are streamed by grade. And as student needs are so diverse, even the best teachers should be supported by an experienced IB Director.

SUCCESS  
RATE\*

\*99% of OSC students believe their grades will improve having attended an OSC IB Revision Course.

“I really feel the urge to congratulate the teachers on their work of these 5 days. My son left home stressed, with no self-confidence, doubting if at all he would be able to pass the exams. He came back full of enthusiasm, motivated, full of praise of his teachers, suddenly full of energy. What did you do to him?! Since then he is working day and night and I am sure he will pass well! Thank you!”
